EPRA NRV, EPRA NTA and EPRA NDV metrics

Definition : Net Asset Value (NAV) adjusted in accordance with the Best Practice Recommendations (BPR) Guidelines published by EPRA in October 2019 for application as from 2020.

Utility: Makes adjustments to the NAV per the IFRS financial statements to provide stakeholders with the most relevant information on the fair value of the assets and liabilities of a real estate investment company, under three different scenarios:

- The EPRA Net Reinstatement Value assumes that entities never sell assets and provide an estimation of the value required to rebuild the entity.
- The EPRA Net Tangible Assets assumes that entities buy and sell assets, thereby crystallising certain levels of unavoidable deferred tax.
- The EPRA Net Disposal Value represents the value accruing to the company's shareholders under an asset disposal scenario, resulting in the settlement of deferred taxes, the liquidation of financial instruments and the recognition of other liabilities for their maximum amount, net of any resulting tax.

For the sake of continuity and comparison with data published in the past, the EPRA NAV and EPRA NNAV, concepts abandoned by the BPR Guidelines, were still calculated and published quarterly in 2020.
